

DEMO QUICK START GUIDE

Now that you have downloaded the DiveCert Software and sample database for your required operating system, this guide will help you set up the system.

Activating DiveCert

1. **Apple OS users:** create a folder in Applications called DiveCert
 - 1.1. Unzip the DiveCert file and copy both 'DiveCert' and 'Admin' into the DiveCert folder within applications that you just created.
 - 1.2. Run 'Admin' which will create the required directory in the following location:
User Name Here/Library/Application Support/DiveCert
 - 1.3. Place the sample database folder into the applications DiveCert folder then follow connecting sample database instructions
2. **Windows users:** run the installation file 'DiveCert.exe' and follow the on-screen instructions.
 - 2.1. Send an email to support@divecert.com requesting an activation key for the demo version.
 - 2.2. After the installation is complete, 2 icons will have been placed on your desktop. 'DiveCert' and 'DC Admin'. Open the DC Admin application.
 - 2.3. The loading screen will now be displayed followed by the database selection window.
 - 2.4. Highlight the local database and click '**Continue**'.
 - 2.5. The Licence Key activation panel will open and display the '**Computer Specific ID**'.
 - 2.6. Copy this ID and send it via email to support@divecert.com requesting demo activation code.
 - 2.7. An email will be sent back to you with an activation code. When this arrives copy and paste the code in to the required box and click '**Verify**'.
 - 2.8. The red cross ✖ on screen will now turn into a green tick ✔.
 - 2.9. You have now completed the installation part.

Connecting the sample database

1. Open the DC Admin application and select local database tab, unlock this using the following password: **dive123cert456**
2. Click on the '+' button on the bottom right of the screen, this will add the title 'Untitled Database' to the database list.
3. Double click '**Untitled Database**' now you can name your database accordingly
4. Click Browse and navigate to the following location:
Windows Users - C:\divecert\sample database\DM\database\ and select db.rsd file
Apple Users – Applications\divecert\ sample database\DM\Database\and select db.rsd file
5. Now make sure the default database file is ticked.
6. Close the DC Admin application, open the DiveCert application and log in with the following:

Username: guest

Password: guest
